Brampton Aerial Lift Train the Trainer

Brampton Aerial Lift Train the Trainer - The Aerial Lifts Train the Trainer Certification Program would teach trainers how to efficiently train operators in safe industrial mobile equipment operation. Trainers are provided with in-depth instruction on aerial lift machinery. The program is offered on an open enrollment basis and delivered at selected training places. Before the certification, trainers are evaluated and graded on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the top training provider in the industry, we offer top notch hands-on training. We provide a lot of chances to practice the techniques and concepts which are learned within the classroom. Together with hands-on experience, trainers develop general understanding of machine theory and instructional techniques, classroom and field communication skills, and ability to efficiently train and assess operators. Trainers would gain knowledge of what traits make an effective trainer.

The Aerial Lifts Train the Trainer Program also teaches the right techniques needed to be able to express the right information in the classroom and field setting. There are three aspects of equipment operation which the trainer must learn how to convey to operators: what to carry out; how to do it; and the reason why it must be carried out.

In the program, trainers would be provided with the detailed, latest reference material to better help them convey the information to equipment operators. The instruction manuals used, include detailed information about all aspects of industrial mobile equipment operator training. Included in the package are training aids that provide a visual reference in order to improve the learning experience. The equipment-specific training products include necessary materials for both the operator and the trainer: overhead transparencies, videos/DVD's, safety message posters, kinds of equipment; digital training aids and stability pyramid.
