

Brampton Order Picker License

Brampton Order Picker License - Order preparation operation or order picking as it is more commonly known is a method used in warehouse operations and consists of staff called order pickers. The order picker's task is to take and collect articles in certain quantities in order to complete the customer's orders prior to shipment. Order picking is a simple warehousing method. The effectiveness in which this task is completed can be directly related to a supply chain's productivity. Hence, order picking is among the most controlled logistic methods. Order picking falls within the category of the warehouse management system.

There are particular types of order picking which consist of: wave picking method, pick to box method, picker to part method or piece picking, zone picking method and sorting systems method.

The pick to box method comprises the order picker filling the box with the stuff from his or her station. The box then moves to other picking stations until the client order is finish. In this particular process, there is no movement of the order picker staff. In the wave picking method, the order pickers move round to be able to collect the needed products for some orders. The piece picking or picker to part method is similar where the order picker or pickers move to collect the items required but for one order only.

In the sorting systems method, there is no movement of the order picking workers. Instead, the products are delivered to her or him by means of an automated system like a conveyor system or an automatic storage. In the zone picking method, each and every order picker is assigned to one specific zone. They are responsible for only realizing order picking in this specific zone.
