

Toyota Forklift

Toyota Forklift Training Brampton - In the U.S., Toyota Materials Handling inc., or TMHU, continues to be the best selling lift truck provider since 1992. This company has been headquartered out of Irvine, California for well over 40 years, providing a comprehensive line of quality lift trucks. With a distinguished reputation of durability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the keystone of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are built here.

All Toyota equipment and components built within North America adhere to the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its dedication to continual improvement and its environmentally friendly systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift trucks emit 70 percent fewer smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and policies.

TMHU, U.S.A.- Leading the Industry

The head of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its dedication to construct high quality lift vehicles at the same time as providing first-rate client assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also called TICO, is listed in Fortune Magazine as the world's largest lift truck dealer and is amongst the magazines celebrated world's Most Admired Companies.

Redefining Environmental Responsibility

Toyota's parent company, Toyota Industries Corporation, has imparted an outstanding company values towards environmental stewardship within Toyota. Toyota's loaded history of environmental protection whilst retaining economic viability can not be matched by other corporations and certainly no other resource handling producer can thus far rival Toyota. Environmental accountability is a key characteristic of company decision making at Toyota and they are proud to be the first and only manufacturer to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift vehicles. Yet one more reason they remain a leader within the industry.

Toyota originally released the 8-Series line of lift vehicles in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission principles, and California's more environmentally friendly emission standards. The end product is a lift truck that creates 70 percent less smog forming emissions than the existing Federal standards allow.

Also starting in 2006, jointly with the Arbor Day Foundation, Toyota added to its commitment to the environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and community parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been scattered through Toyota Industrial Equipment's system of sellers to non-profit organizations and local customers to help sustain communities all over the U.S.

Industry-Leading Safety

Toyota's lift vehicles offer enhanced durability, visibility, efficiency, ergonomics, and all the foremost safety technology that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS", helps decrease the risk of mishaps and accidental injuries, in addition to increasing productivity levels while minimizing the potential for merchandise and equipment damage.

System Active Stability can discern situations that might lead to lateral volatility and potential lateral overturn. When any of these conditions have been detected, the SAS will instantaneously engage the Swing Lock Cylinder to re-stabilize the rear axle. This adjusts the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding strength.

The SAS systems were originally utilized on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped propel Toyota into the lead for industry safety standards. Now, SAS is utilized on practically every modern internal combustion products and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with mandatory operator education, overturn fatalities across all models have decreased by 13.6% since 1999. Furthermore, there has been an overall 35.5% drop in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's uncompromising principles continue far beyond the technology itself. The company believes in offering extensive Operator Safety Training programs to help users meet and exceed OSHA standard 1910.178. Education courses, video tutorials and an assortment of resources, covering a broad scope of subjects-from personal safety, to OSHA regulations, to surface and load situations, are accessible through the seller network.

Toyota's Dedication to The U.S.A.

Since the transaction of its first lift truck in the U.S. to the fabrication of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has maintained a solid existence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in America now are built in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of property. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service components, with the entire investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and clients of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a education center.

First in Customer Satisfaction and Service

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations all through the United States, providing the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Licensed Used lift trucks, service, components, and financing features make Toyota dealerships a one-stop shop to guarantee total client satisfaction.
